Introduction

Workshare Professional is a desktop application that automates managing changes to business documents, protects against unauthorized content disclosure and delivers the world's most secure PDF creation, all in one integrated solution.

Workshare Professional is designed for the way that you work – within Microsoft Office. Workshare Professional integrates with your existing desktop productivity software Microsoft Word, Excel and PowerPoint and your email applications such as Microsoft Outlook or IBM Lotus Notes. In addition, many companies use Document Management Systems (DMSs) and/or Microsoft SharePoint to track and store key documents and Workshare Professional integrates out of the box with these.

Workshare Professional provides:

- Fast and accurate multi-party document review
- Elimination of version/master proliferation and confusion
- Fast and accurate document comparison including “one-to-many” comparison
- Policy-driven content risk management and PDF conversion
- Storage of attachments in the cloud
- Discovery and removal of hidden data and visible content leaks
- Ability for users to fix potential problems with manual redaction options
- Secure PDF conversion anywhere and on email send
- Extended and secured document control over email and portals
- Accurate conversion of PDF files to Microsoft Word files
- Ability to combine multiple files into a single PDF
- Ability to generate a Redline (comparison) document from Microsoft Outlook

The Workshare Professional suite of products includes:

- | | |
|--------------------------|---|
| Workshare Compare | The world's leading and fastest comparison tool especially critical for complex business documents in any language with difficult to compare changes like tables, complex formatting, numbering and styles. |
| Workshare Protect | Workshare's market leading and award winning client educates users as it enforces content security policy. Working both online and offline, the Workshare Protect client removes risky content, converts information to appropriate formats, and applies content rights. Workshare Professional also includes support for new Workshare server components that complement this advanced new Workshare Protect client. |
| Workshare Review | The fast, accurate and secure way to review and exchange business documents. Workshare Professional Review eliminates version/master proliferation and confusion when sharing documents across email, portals, and document repositories and provides full document lifecycle audit and visibility. |

Workshare Professional Benefits and Features

Workshare Professional provides accurate and efficient review control, comparison, and security while automatically maintaining a single master document

- **Advanced PDF and document comparison**
Compare one document against multiple modified versions including Word to Word, PDF to PDF, and Word to text-based PDF.
- **Advanced and trusted accuracy**
Accurately compare complex documents (100+ pages) for changes in text, embedded excel tables and images.
- **Document redlining made simple**
Email redlines as tracked changes or save redlines as a PDF document.
- **Multiple comparison interfaces**
Utilize the standalone document comparison tool or work within Microsoft Word.
- **Alert and Compare**
Generate Redline documents from Microsoft Outlook
- **Manage and track document reviews**
Give authors, delegates and reviewers an easy means to assemble, review and verify document changes.
- **Single master tracking**
Ensure the correct version of a document is under review by colleagues, clients and partners regardless of where the document is stored.
- **One click PDF creation**
Create a PDF with one click when attaching a file to an email or from within Microsoft Office applications
- **Edit and collaborate on PDF documents**
Convert text-based PDF documents into Microsoft Word for editing
- **Combine PDF**
Combine multiple files into a single PDF.
- **Convert and compare image-based documents**
Convert and compare scanned documents, images and faxes when used with the Workshare OCR Server.
- **Remove sensitive information**
Ensure total cleanup and removal of all hidden electronic information with metadata removal and redaction tools in Microsoft Office and PDF documents.
- **One click email protection**
As an alternative to the Workshare Protect Email Security dialog, simply click a profile to apply security to emails and their attachments.

- **Storage of Attachments in the Cloud**

To free users from having to send attachments by email and to facilitate the sharing of files outside of email, users can upload attachments to the Workshare platform and send recipients links to the documents in Workshare.

- **Classify documents**

Easily restrict access to sensitive business documents by setting document classifications.

- **Detect confidential information**

Utilize the Workshare Policy Designer to identify intellectual property or sensitive information such as financial data or passwords within email or Office documents.

- **Full PDF security**

Through policy rules your organization can enforce PDF creation with 128-bit encryption and restriction rules.

- **Audit and reporting**

Track and report every document change made inside and outside of the organization.

What's New in Workshare Professional 7.5

Workshare Professional 7.5 includes the following new features:

- **Faster comparison for DOCX files**

The fast comparison previously only available for DOC files is now also available for DOCX files (Word documents Office 2007 - 2013). Select **Fast** as the Comparison Mode when comparing using Workshare Compare. To enable this feature, select the **Enable fast comparison for DOCX files** parameter in the Workshare Configuration Manager (**Comparison > Administration** category).

- **Improved table comparison**

The comparison of tables within documents is enhanced with the Redline showing clear and accurate results even in complex areas such as Excel tables within documents, tables with no changes, changes to the structure of a table.

- **Compatibility with Windows 8 and Office 2013**

- **Improved Send Link process**

The flow of the send link process where the user uploads documents to the Workshare platform and sends a link to the document within the platform has been improved so the user experience is less convoluted.

- **Ability to change the default user location for rendering sets**

By default, personal rendering sets are stored in C: Users > (user name) > My Documents > Workshare > Rendering. This can now be changed by an administrator by specifying a different location for the **Default rendering set location** parameter in the Workshare Configuration Manager (**Comparison > Administration** category).

- **Ability to display/hide the Add Large Attachment button**

Users can select whether the **Add Large Attachment** button is displayed in email messages using the **Display Add Large Attachment button (Outlook)** parameter in the Workshare Configuration Manager (**Protection > Send Link** category). The **Add Large Attachment** button enables the user to use Send Link functionality to send a link to a large file when it cannot be sent by email. (Administrators may set a limit on the size of files that can be emailed to avoid large files blocking Exchange.)

- **Detection of Workshare styles**

Workshare Protect checks emails and their attachments to see if they include any Workshare styles. (Workshare styles are applied to changes in a Redline document.) To enable this feature, select the **Detect Workshare styles** parameter in the Workshare Configuration Manager (**Protection > Administration** category).

- **Ability to enable PostScript simulation**

Users can turn on the PostScript simulation option in the printer driver using the **Enable PostScript simulation** parameter in the Workshare Configuration Manager (**Protection > Convert to PDF** category). This is relevant when converting documents to PDF that include WordArt and semi-transparent backgrounds.

In addition, over 50 individual change requests have been addressed (see page 11) and many quality improvements made.

System Requirements

The system requirements for Workshare Professional 7.5, Workshare Compare 7.5 and Workshare Protect 7.5 are as follows:

Minimum System Requirements	Intel Pentium 4 3.2GHz processor 1.5GB RAM 1GB free disk space
Recommended System Requirements	Intel Core 2 DUO @ 2.2GHz AMD Athlon 64 X2 4400+ 2GB RAM 2GB free disk space

Certified Environments

Workshare Professional 7.5, Workshare Compare 7.5 and Workshare Protect 7.5 have been tested and certified in a number of environments. If your environment is not included in the following list, it may still be a compatible environment. Contact Workshare Customer Support (support@workshare.com) for any help.

For details of which environments previous versions of Workshare Professional, Workshare Compare and Workshare Protect were certified against, refer to previous versions release notes at <http://www.workshare.com/resources/user-guides>.

Note: Unless otherwise stated, all environments are the English version with the en-us language set.

Operating System:

- Microsoft Windows 8 (32 bit and 64 bit) + Japanese
- Microsoft Windows 7 SP1 (32 bit and 64 bit) + Chinese Simplified & French
- Microsoft Windows 7 (32 bit and 64 bit) – default UAC

Note: *Windows XP and Windows Vista are not supported in this release.*

Citrix:

- Citrix XenApp 6.5
- Citrix XenDesktop 5.6

When running on the following:

- Microsoft Windows R2 Server 2008 SP1 (64 bit)

Note: *Check with your Citrix vendor about which Windows operating system supports your version of Citrix.*

Microsoft Office System:

- Microsoft Office 2013 (32-bit) + Japanese
- Microsoft Office 2010 SP1 (32-bit) + Chinese Simplified & French
- Microsoft Office 2007 SP3 (32-bit)

Email System:

- Microsoft Outlook 2013 (32-bit) + Japanese
- Microsoft Outlook 2010 SP1 (32-bit) + Chinese Simplified & French
- Microsoft Outlook 2007 SP3 (32-bit)
- IBM Lotus Notes 8.5.3 FP3

Note: *The Send Link feature of Workshare Protect is not supported in a Lotus Notes environment*

SharePoint:

- Microsoft SharePoint 2010
- Microsoft SharePoint Server 2007

DMS Integration:

Note: *Check with your DMS vendor about which Windows operating system supports your DMS.*

- **Autonomy iManage:**
 - FileSite 8.5 SP3 Update 5
 - DeskSite 9.0 Update 2a
 - DeskSite 8.2 SP2 P2a
 - FileSite 9.0 Update 2a

- **Open Text:**
 - eDOCS DM 5.3.1 COM only (Patch 3)
 - eDOCS DM 5.21 CU6

Note: *Worldox integration is supplied and supported by Worldox.*

Workshare will endeavor to support future service packs of certified environments.

Important Information

- **Send For Review** – If an error appears “Workshare Protect was unable to process this email” when Sending for Review a user is advised to restart Microsoft Outlook.
- **Secure PDFs** – Workshare Professional is unable to compare secure PDFs or convert secure PDFs to DOC format. Secure PDFs are PDF files with security settings configured.
- **Licensing** – If the product is licensed on subscription basis, one month before your subscription license expires, you can choose to receive a popup Expiry Notice on a daily basis. You can configure Workshare Professional so that the Expiry Notice is displayed/not displayed as required. For further information, refer to the Licensing Workshare Professional section in the Workshare Installation Guide.
- **Policies Not Triggered** – When emailing password-protected .docx documents, default policies are not being triggered. This is due to the Microsoft Word Security Update KB969604.
- **Add Large Attachment** – When using the Add Large Attachment button to send a link, do not use the Advanced Options functionality.
- **POP/IMAP** – Workshare Professional does not support Outlook when it is configured with a POP or IMAP account.

Important Installation Information

- Workshare Professional installs program files to a sub-folder within the Workshare folder named **Modules**.
- **Install:** A user is unable to install Workshare Professional if Microsoft Windows Installer 3.1 is not installed. This can be downloaded from the following location <http://www.microsoft.com/downloads/details.aspx?FamilyID=889482FC-5F56-4A38-B838-DE776FD4138C&displaylang=en>.
- **Windows Vista:** For MSI installs the user must have administrative privileges for the Default Mail Client.
- **Internet Explorer:** You must ensure that your email application is set as the default mail program in Internet Explorer. In Internet Explorer, select **Internet Options** from the *Tools* menu. In the **Programs** tab, select your email program (Microsoft Outlook) from the **E-Mail** dropdown list. If this is not done, you will not be able to send a document for review.
- **Windows 7:** When UAC is set to **Default**, running the Workshare Professional install displays the UAC prompt. You must approve the prompt and Workshare Professional will be installed. Running the Workshare Professional MSI silently will fail when UAC is set to **Default** because the user is not given the opportunity to approve the UAC prompt. Therefore for silent installs, disable UAC.

- **VSTO Prerequisite and Installation using MSI Modes:** The Workshare Professional 7.50 installer (msi and msp) will not check for the presence of the VSTO prerequisite. The installation will proceed without this prerequisite but the Workshare Outlook Add-in will not be available causing a loss of the Workshare Protect email functionality. If deploying Professional 7.50 using the msi or msp you must first deploy the VSTO. This note applies only to Office 2007 (all service packs) and Office 2010 (without a service pack). For Office 2010 SP1 and above and Office 2013, VSTO is already installed.

If you have installed any Alpha or Beta builds of Workshare Professional, we strongly recommend that you first uninstall them before installing Workshare Professional 7.5.

Installing Workshare Professional 7.5

Workshare Professional 7.5 (Build 16000.600) will uninstall previous versions and can therefore be installed without uninstalling previous versions of Workshare Professional. Versions prior to 7 will have their settings upgraded; version 7 will not have the settings upgraded.

Known Issues

The following are known issues in the Workshare Professional 7.5 release - for more information, please contact Customer Support.

ID	Details
12461/ 12453	Issues with Foxit PDF Files PDFs are not supported which are created or edited by Foxit PhantomPDF.
13962	Send Link and Logging In – Windows 8 (x64) Office 2010 SP1/2013 When sending several emails and selecting the Send Link profiles, the user is prompted to log into their Workshare account every time. Be sure to validate your Workshare account before sending several emails.
14365	Send Link After selecting a Send Link profile to upload attachments to the Workshare platform, canceling the upload process part way through stops the email from being sent but the attachments are still uploaded.
14422	Detect Workshare Styles – Windows 7 (x86)/Office 2007 SP3 and Windows 7 (x86) SP1/Office 2010 When Workshare styles have been detected in a comparison and the comparison is saved as a DOC file, subsequent content risk discovery on the DOC file does not discover the Workshare styles. Note: If the comparison is saved as a DOCX file, the Workshare styles are discovered.
14590	Lost Attachment – OpenText DM 5.3.1 COM Suite Patch 3/Windows 8 (x64)/Office 2010 SP1 When sending an email with attachments both from the DMS and the local file system, and the DMS file is the FIRST attachment, the local file attachment is lost.

ID	Details
14629	<p>Save as Convert to Track Changes Document</p> <p>The Save As > Save As Track Change document feature in Workshare Compare is not working. However, the user can convert a Redline document to a Word document showing the changes as track changes using the right-click Convert to Track Changes option.</p>
14656	<p>Sending Emails with DM Profiling – OpenText DM 5.3.1 COM Suite Patch 3/Windows 8 (x64)/Office 2010 SP1</p> <p>When DM profiling is selected (File > DM Options, select Profile on Send tab and select e-mail message before sending e-mail in DM Email Options dialog), sending emails and applying a Protect profile, an error is displayed.</p>
14904	<p>Sending Emails via Right-click Option - Windows 8 (x86)/Office 2013</p> <p>After successfully sending an email using the right-click Send to > Mail recipient option, trying for a second time to send an email using the same process, the email window is not displayed and the action is not performed.</p>
14910	<p>Workshare PDF Publisher - Windows 8 (X86)/Office 2010</p> <p>When printing from Word or Excel and selecting Workshare PDF Publisher as the printer, an error is displayed.</p>

Change Requests Fixed

The following are fixed customer change requests that have been validated for this release - for more information, please contact Customer Support.

Compare

CR #	Description
00165749	Professional 7.00 - Missing deletion in table comparison
00165858	Professional 7.00 - Incorrect use of padding cells in table comparisons
00165940	Professional 7.00 - Table rendered off the page after table comparison
00166342	Professional 7.0 - Ability to Change Default Save Location for Rendering Sets
00167285	Attempting to edit redline first saved as PDF results in Failed to run Act on Changes error
00165749	Professional 7.00 - Missing deletion in table comparison
00165856	Professional 7.00 - Incorrect insertion in table comparison
00165857	Professional 7.00 - Incorrect use of merged cells in table comparisons
00165940	Professional 7.00 - Table rendered off the page after table comparison
00171889	Professional 5.2 SR3 - Missing text in comparison of manual list items
00168918	Professional 7.00 FP1 - Numbering insertion not showing when using 'Convert to Track Change Document'

CR #	Description
00168256	Professional 7.00 - Compare loses focus when comparing documents stored within DM 5.3
00177284	Professional 7.0.0 + FP2 - PDF Button on Compare ribbon does not function when comparing documents from Desksite
0011129	Workshare 5.2 - "Huffman symbol not found in JPEG read" error when comparing docs with Optimized JPEG
00171968	Professional 7.00 FP1 - Request for Complete Display of Lowercase Letters
00182505	Professional 7.00 FP3 - Table is shifted in saved redlines when source documents created with MacPac "memo" template
00177939	Professional 7.00 FP3 - Email signature not added when emailing from Compare or Word
00160628	Professional 7.00 - Tooltip showing redline document names missing in Compare
00172911	Professional 7 + FP1 - "Only print pages with changes" option causes extra pages when printing documents with page breaks or section breaks
00114678	Workshare 5.2 SR1 - Unable to save the redline as a version to either source document in Interwoven
00111812	Workshare 5.2 SR1 - Incorrect comparison of Japanese documents is shown when saved as DOC or PDF format
00095254	Workshare 5.1 - Comparing unsaved documents in Office 2007 prompts to save locally and not in the DMS

00093743	Workshare 5.1 - Fail Safe Mode does not work when comparing PDF files
00068366	Workshare 4.5 SR1 - Document formatting is incorrect when compared in DeltaView
00171579	Professional 7.00 FP1 - FP1 Replaces '#' with '_' when Appending Document IDs to Default Filenames
00165808	Professional 7.00 - Grey panel is displayed in TER view when comparing documents that contain a text box that is 11.9cm or more from the right of the page
00163698	Professional 7.00 - Dotted lines around changed images do not appear when redline converted to PDF
00124048	Workshare 5.2 SR2 RC - WDF and WWB file types do not have registered icons
00103245	Professional 5.2 SR1 - Swap button in the Document Selection window doesn't work if only one document selected
00172058	Professional 7.0.0 + FP1 – Tables In Footnotes Are Incorrectly Displayed In TER
00159207	Professional 5.2 SR3 - Document numbering is displayed incorrectly when comparing documents within Word
00147059	Professional 5.2 SR3 - Document Headers are not displayed correctly within TER
00142388	Professional 5.2 SR3 - TER view shows incorrect table formatting if table width exceeds the page margin width

CR #	Description
00179022	Professional 7.00 - Unable to compare PDF documents generated by MS Project 2010
00177577	Professional 7.00 FP2 – Tables are incorrectly rendered
00148595	Professional 5.2 SR3 - WinWord Freezes when attempting to email redlines from within Compare
00174026	Professional 7.00 FP1 - Workshare Interwoven save as dialog does not appear when saving comparison into DMS
00178446	Professional 7.00 FP2 - Document numbering is rendered incorrectly when comparing documents with MacPac numbering
00174578	Professional 5.2 SR3 - PDF comparison results in poorly formatted redlines in TER
00177506	Compare Server 5.2 SR3 - Text in the header or Footer cannot be compared
00178844	Professional 7.00 FP3 (15000.1000) - Bookmarks in Modified Document Not Present in Redline
00179143	Professional 7.00 FP3 - Document bookmark _ljs_searchstart causes sections of the redline to not be rendered
00181558	Professional 7.00 FP3 - Text Duplicated in Redline
00182810	Professional 7.00 FP3 - Unexpected exception when attempting to compare SharePoint documents in Word
00182246	Compare 7.00 FP3 - Text missing from second-level numbering in redline
00183008	Professional 7.00 FP3-- Redline statistics page is printed on A3 paper

Protect

CR #	Description
00175053	Professional 7.00 FP2 - Attachment is renamed when forwarding emails both internally and externally
00179105	Professional 7.0 FP2 - Content Discovery Fails when sending Word Document with Empty Custom Property
00169830	Professional 7.0 FPI- Text Incorrectly Displayed In The Document When Creating PDF Using "Send as Comparison Document" Option In Workshare
00172477	Professional 7.00 FP1 - First DOC/DOCX Attachment Opened on Each Launch of Outlook Not Read-Only
0096242	Workshare 5.1.1 - Message files with embedded Word 2007 docx documents are becoming corrupt during send and clean with Workshare Professional.
00140938	Professional 5.2 SR3 - 30 Second delay when sending an email for the first time of opening Outlook
00175824	Progress Bar not displayed when clicking Advanced Options link from Protect Simple

CR #	Description
00178089	Professional 7.00 FP3 - Request to configure the display of 'Add Large Attachment' button
00173388	Professional 7.00 FP1 - "Document discovery failed" error when Batch Cleaning/Sending via Protect
00164132	Professional 7.00 - Error in Action when sending any .DOC file with color background and white text Table of Contents
00149772	Professional 5.2 SR3 (9800.2400) - Second Word Session Opened from PES Preview Closes after Send
00152657	Professional 5.2 SR3 (9800.2400) - Sending HTM files causes Protect to freeze
00151689	Professional 5.2 SR3 (9800.2400) - Batch Clean Does Not Remove Comment Indicators in Excel Files
00147574	Professional 5.2 SR3 - Could not complete the operation error creating Outlook Notes
00141284	Workshare 5.2 SR2 - Unable to preview protected documents from the Protect dialog box
00121075	Workshare 5.2 SR1 - White text and/or small text will not be cleaned from within a text box if more than one text box exists in a document
00180771	Professional 7.00 FP3 (15000.1000) - Canceling Protect Results in Two Outlook Prompts when Closing Outlook
